

Dräger PARAT® 4500 Industrial Escape Hood

Where hazardous substances exist in your workplace, you can never entirely rule out the possibility of these substances leaking out into the air. However, with the correct safety precautions, including the use of the Dräger PARAT® 4500, you can escape safely.

Equipped with a highly efficient combination filter the Dräger PARAT® 4500 Industrial Escape Hoods give you a minimum of 15 minutes escape protection against toxic industrial gases, fumes, and particles – helping you to escape to safety.

As the Dräger PARAT® 4500 is a hooded device it protects the whole head from dust and gases and ensures a safe escape also for bearded users and spectacle wearers.

In an escape situation there is no time for blurred vision. The Dräger PARAT® 4500's wide visor specially treated with an anti-fog coating keeps your vision clear during the escape.

According to your application you can choose from three different packaging

options of the Dräger PARAT® 4500: the soft pack easy to carry along, the traveller pack in a well-protected plastic case and the heavy-duty box tried and tested in heavy industry.

Benefits:

- Highly visible hood in a universal size with a flexible neck seal
- Wide, anti-fog coated visor for a clear view during an escape
- Highly efficient filter: protects from toxic industrial gases, fumes and particles
- Three different packaging variations – the right option for every environment

Dräger PARAT® 4500 – another quality product from Dräger.
